To whom it may concern

Our ref: Authorization for use of corrosion inhibitor on A22 aircraft

Subject: **AUTHORISATION FOR USE OF CORROSION INHIBITOR ON A22 AIRCRAFT**

Aeroprakt Limited approves the application of corrosion inhibitor – for example Corrosion-X and ACF50 – to A22L and A22LS aircraft, provided the application is carried out:

(a) by or under the supervision of a suitably licensed engineer - eg in Australia by at least an L2 or LAME, or

(b) by an approved maintenance and repair organisation with experience of repairs to metal and fabric covered airframe aircraft.

Repairs should be completed according to generally accepted standards – for example, but not exclusively: AC43.

Aeroprakt Limited will supply factory repair parts only to our exclusive distributor in Australia or direct to a licensed engineer or approved organisation as agreed with our distributor. Other general materials such as paint and inhibitors may be sourced from suitably approved outlets.
